EDUCATION

UCLA ANDERSON SCHOOL OF MANAGEMENT — Los Angeles, CA
M.B.A., Full-Time Program, Technology Management specialization, GRE: 337 (Q170/V167) — Jun 2027

GEORGIA INSTITUTE OF TECHNOLOGY — Atlanta, GA
M.S., Computer Science, Computational Perception & Robotics Specialization — *Admitted; starts Spring 2027*

NATIONAL CHIAO TUNG UNIVERSITY | *M.S., Civil Engineering* — Hsinchu, Taiwan | Jan 2020

NATIONAL CENTRAL UNIVERSITY | *B.S., Civil Engineering* — Taoyuan, Taiwan | Jul 2017

EXPERIENCE

AVRIDE | UCLA Anderson MBA Capstone, autonomous delivery robots — Los Angeles, CA
Capstone Team Lead — Nov 2026 – Present

- Sourced and signed Avride (1,000+ delivery robots, 25+ U.S. campuses) as our partner; leading a 5-person team.
- Building a tiered pricing model for smaller campuses and a go/no-go framework for new campus and city markets.

UCLA ROBOT INTELLIGENCE LAB | Prof. Yuchen Cui — Los Angeles, CA
Graduate Student Researcher — Oct 2026 – Present

- Proposed two research directions on manipulation robustness: how demonstration safety margins carry into imitation-learning policies, and how physics-solver disagreement affects sim-to-real transfer.

CMIS.ai | AI Construction Management System for General Contractors — Taipei, Taiwan
Founder & Product Lead — Jun 2026 – Present

- Founded CMIS.ai to automate documentation, compliance tracking and multi-party coordination for contractors.
- Defined PRDs and a multi-agent architecture; built a vision pipeline turning site photos into structured records.
- Lined up 2 pilot users (an engineering consultancy and a Taiwan general contractor); driving on-site adoption.

AGIBOT | *Humanoid Robotics Company* — Los Angeles, CA
MBA Intern, Product & GTM — May 2026 – Jul 2026

- Benchmarked AGIBOT humanoids against Unitree across locomotion, manipulation, autonomy and safety.
- Turned field diagnostics and customer feedback into PRDs and a prioritized hardware-software roadmap.

F1TENTH AUTONOMOUS CAR | Independent project | Demo video — Jan 2026 – May 2026

- Built a 1/10-scale autonomous car solo, from BOM and parts sourcing through hardware assembly (Jetson Orin Nano, LiDAR, IMU, VESC) and ROS 2 integration; ~5K lines of Python/C++.
- Designed for safety: emergency braking with a redundant brake path to the VESC; recovered from a steering-servo failure by rebuilding the VESC firmware from source.
- Implemented SLAM, localization, Pure Pursuit, RRT* and MPC; debugged sensor sync; 4.47× CUDA speedup.

ZENDESK | *James Tech Consulting Group (Zendesk's official partner)* — Taipei, Taiwan
Product Manager — Mar 2025 – Jul 2025

- Owned 0-to-1 product lifecycle and GTM launch for an enterprise AI ticketing and customer support platform, scaling product adoption to double division revenue within 5 months while cutting resolution effort by 70%.
- Defined technical specs and managed model fine-tuning for BenQ's AI CRM: 92% accuracy, $200K/month saved.

CHINA ENGINEERING CONSULTANTS, INC. | *Leading engineering consultant in Taiwan* — Taipei, Taiwan
Technical Program Manager — Jun 2024 – Feb 2025

- Ran program governance for a $3.3B underground railway program, aligning 5+ public and private agencies.
- Led root-cause data diagnostics on a critical system bottleneck, saving $1.5M and pulling delivery in 12 months.

TAOYUAN CITY GOVERNMENT | *Department of Infrastructure* — Taoyuan, Taiwan
Senior Project Manager — Aug 2020 – May 2024

- Managed a $63M capital portfolio through pandemic supply-chain disruptions, achieving 10% ($6.3M) net savings.
- Standardized PMO governance and milestone dashboards across 3 mega-programs, cutting costs 15% with zero slippage.

ADDITIONAL

- *Program*: Critical-Path Scheduling (Primavera P6), Agile (Notion), Risk & Vendor Management, HW-SW Integration
- *Technical*: Python, C++, SQL, ROS 2, SLAM, OpenCV, PyTorch, CUDA, Jetson, LiDAR/IMU, MuJoCo, LLM Agents
- *Languages:* English (Fluent), Mandarin (Native) | Interests: Piano, Basketball, Golf
